

RaphCare mobile update (v1.8.3+15)

Android patient app build **1.8.3** (install code **15**). File name: `RaphCare-v1.8.3+15.apk`. This build talks to the staging API, not a phone on localhost.

Why this build: the Home wellness tip should follow your mood check-ins, not pretend you had a positive week.

Fixed

- Home no longer shows a static “positive this week” tip when you have not checked in.
- Mental Health insight card uses the same mood-based copy after you log how you feel.

Updated

- Wellness tip on Home reflects recent check-ins (positive, steady, mixed, or low).
- When there are no check-ins, Home asks you to log one in Mental Health.
- Version label **1.8.3** and install code **15**.

Install

1. Uninstall any older RaphCare build if Android blocks the update.
2. Copy `RaphCare-v1.8.3+15.apk` to the phone (USB, Drive, or email).
3. Allow install from that source if Android asks.
4. Sign in as the demo patient: `demo.patient@raphcare.com` (password on the demo accounts sheet).

This is for sideload testing, not the Play Store.

What to try

1. Sign in as the demo patient.
2. Open Home. If you have not logged a mood, confirm the tip asks you to check in (not a fake positive week).
3. Open Mental Health, tap a mood, return to Home. Confirm the tip matches that check-in.
4. Ask AI Assistant still opens from Home when a tip from mood is showing.
