

RaphCare partner update (3 Sep 2026)

Here is what landed today on staging. Short version: **Ops** (watch fleet) is live on its own site, the **Portal** admin shell is hospital-first (no platform left menu), and a hospital-list bug for the demo admin account is fixed. You do **not** need a new phone APK for this drop.

1. What changed

Ops (wearable fleet)

- Staging Ops site: <https://raphcare-ops.azurewebsites.net>
- Sign in with `demo.ops@raphcare.com` (same demo password as the other staging accounts).
- **Add to stock** now uses clear model choices (E585, E580, Y6 Pro) instead of a dropdown.
- Fleet work stays on Ops. It is not on the hospital Portal.

Portal (hospital admin)

- No platform left menu. The top bar always has **All hospitals**, **Register hospital**, search, language, and sign out.
- If you only have one hospital (like the demo admin path), you land in that hospital's dashboard. If you have more than one, you start from the hospital list.
- Opening a patient chart from Inpatient (or Collection, Casualty, and similar) and using **Back** returns you to that section with the right place highlighted.

Fixes

- **Demo hospital list:** `demo.admin@raphcare.com` should only see **RaphCare Demo Clinic**. An unrelated hospital (for example a private test site) must not appear on that account. Ops (`demo.ops`) can still see hospitals when assigning watches.
- Searchable dropdowns close when you click outside, and they are less likely to get clipped by card edges.

2. Demo accounts (staging)

Shared password: `RaphCareDemo!2026`

Who	Email	Where
Hospital admin	demo.admin@raphcare.com	Portal
Doctor	demo.doctor@raphcare.com	Portal
Pharmacist	demo.pharmacy@raphcare.com	Portal
Lab	demo.lab@raphcare.com	Portal
Patient (phone)	demo.patient@raphcare.com	Android APK
Ops (fleet)	demo.ops@raphcare.com	Ops site

One-page private sheet: [raphcare-demo-accounts-v2.pdf](#) .

Portal staff sign-in: [Professional sign-in](#)

Ops sign-in: <https://raphcare-ops.azurewebsites.net/signin>

3. Patient Android APK

No new APK with this update. Keep using the current staging build **1.5.2** (file like `RaphCare-v1.5.2+10.apk`) and the matching mobile note. Today's work is web, Ops, and API only.

4. Links

- Portal: <https://raphcare-hqf6gsa3acanargz.southafricanorth-01.azurewebsites.net>
- Ops: <https://raphcare-ops.azurewebsites.net>
- API: <https://raphcare-api-eydjcnefhae2dpa2.southafricanorth-01.azurewebsites.net>
- Public site: raphcare.com

5. Partner checklist

Overall partner board remains about **81%**. Hospital admin and inpatient stay at **100%**. Phone app is unchanged by this drop.

Try this week

1. Sign in on the Portal as hospital admin. Confirm there is no left platform menu. Confirm you only see **RaphCare Demo Clinic** on All hospitals.
2. Open Inpatient, open **Demo Inpatient**, use **Back**, and confirm you return to Active admissions with that section highlighted.
3. Sign in on Ops as `demo.ops@raphcare.com` . Open Wearable fleet. Add a serial and pick a model (E585, E580, or Y6 Pro), then assign it to the demo patient if you want.
4. On the phone, keep the existing **1.5.2** APK. No reinstall required for this web and Ops drop.

Thanks,
Daskana
