

Demo accounts for testing

RaphCare Demo Clinic · staging · 29 August 2026

These logins are for the staging site. They are fake people, not real patients. Use them to try the clinic screens and the patient app. Other hospitals on the same site are left as they are.

Keep this sheet to yourselves. It has the shared password. Do not post it on a public page.

Where to sign in

Staff (hospital admin, doctor, pharmacy, lab): open the admin site, then Professional sign-in.

<https://raphcare-hqf6gsa3acanargz.southafricanorth-01.azurewebsites.net/professional/signin>

Patient: use the Android app with the patient account below. You can also try [patient sign-in on the same website](#).

You will not get a second email code. After the password, you go straight in.

PASSWORD FOR EVERY DEMO ACCOUNT

RaphCareDemo!2026

Staff accounts

Open **RaphCare Demo Clinic** after you sign in.

Role	Email	What to try
Hospital admin	demo.admin@raphcare.com	Open the clinic. Check inpatient, collection, appointments, and the waiting screen.
Doctor	demo.doctor@raphcare.com	Patient chart, visits, notes, prescriptions, lab orders.
Pharmacist	demo.pharmacy@raphcare.com	Collection: find a pickup, Call, mark collected.
Lab	demo.lab@raphcare.com	Collection: find the lab order, enter a result.

Patient account

Role	Email	What to try
Patient	demo.patient@raphcare.com	Home, health records, pickup code and QR, notices when staff tap Call.

There is also a chart named **Demo Inpatient** (no login). That person is already in a bed, so you can see inpatient occupancy without admitting anyone first.

Pickup codes already in the clinic

Use these on Collection, or type them in search.

Code	What it is	State
2DEM2A	Prescription (Amoxicillin)	Waiting
2DEM2B	Lab (full blood count)	Waiting
2DEM2C	Prescription (Paracetamol)	Already called to the counter

The waiting screen shows pickup codes only. It does not show names or medicines.

A path that covers most of it

1. Sign in as **hospital admin**. Confirm you land in **RaphCare Demo Clinic**. The left menu should hide. Use **All hospitals** in the top bar to go back to the list.
2. Open **Collection**. Search **2DEM2A**. Tap **Call**. Open the waiting screen in another tab. You should see the code on the TV view.
3. Sign in as **pharmacist** (or stay as admin). Mark that prescription collected. Print a slip if you want. Try the wall poster for the counter.
4. Sign in as **lab**. Find **2DEM2B** and enter a result.
5. Open **Inpatient**. You should see **Demo Inpatient** in a bed. You can admit someone else if you add a free bed, then discharge them.
6. On the **Android app**, sign in as the patient. Health records should show a pickup code and a QR code. When staff tap Call, the app should say come to the counter.

If something does not load

The staging sites can take a minute to wake up. Refresh once. If sign-in still fails, tell me which email you used and what the screen said.

These accounts live on staging only. They are not for a live clinic. The public site is raphcare.com.

Thanks,
Daskana
